

Billet timing pointer for Ford 2.3

Billet aluminum timing pointer for Ford 2.3 engines. CNC machined in the USA from 6061 aluminum for precision and anodized for protection, this timing pointer will replace the unsightly plastic cover which so often breaks on these engines. The marker is also adjustable to allow for precision setting when TDC can be measured exactly. Includes fasteners. \$55.00 (Includes shipping inside the continental US. Outside the US, please email us for a specific shipping quote).
