

SN95 gauge plate

Designed to fit two or three 2-1/16" gauges in the location originally occupied by the factory CD player in '94-'98 SN95 Mustangs. CNC machined in the USA and made from 6061 aluminum and hard anodized black for a durable finish. Installation is a breeze using the special retaining nuts and included hardware. Some minor trimming of the factory opening is required to clear the mounting cups which retain the gauges to the plate. (Gauges are not included.) \$67.95 shipped anywhere in the continental USA. International orders please email us for shipping costs.
